I use "lsmod | grep 1394" to see and got

```
ohci1394          38576  0
```

```
ieee1394          94660  1 ohci1394
```

and next how to do?

By the way, I want to use "Kino" to program my DV .
