Modo, I love the music and the flowers. I wish I could plant some.  
that is easy, just send me your address, your wish will come true.

So, it did rain! And I'll pocket the rain check for later use.

Questions:

1) Do they bloom at midnight and for two or three hours only? If so, that's kind of short-lived.

2) What kind of glue is that that you mentioned in the given link?

1) i donâ€™t know all of them, you can find from that web page, I start planted from 2008, just got first blossom this year, the one bloom at home, did blossom in the morning and keep to next morning, it blooms 1.5 day, suppose it can bloom for 2 days if in good condition, I cut the breach put in water for taking pictures at home.

2 glue is not a good idea, just keep the knife and cut clean and dry will be better.

I used two kind of glue, one is for glue wood ç†±æ°¶è† , one is for glue paper ç™½è† , last one too wet not good.
