Late at night - or I should say at dawn - I finally cleared the problem too... Yes, you are right (thanks anyway!

)

(I simply did not know å• has this meaning too. This is the example in my grammar book:

ä»-å•æ^'å€Ÿä'!ä°†ã€,

He borrowed a book from me.

)

This is the article I read yesterday, yes, I find him a really interesting man too (and he must be also a gourmet, å""å"" - and (for me) it is even more very interesting to see the terms that are in general use about/in social sciences. I especially like ones like å°•å±,ç±¼ä¼šä°°, in which I know all parts, but never could have guess this is how the Chinese language expresses it.
