The Law of attraction is not simply how to attract the other
to make you an attention.

Law of attraction is a mind which makes people to
become success for instance I want how to win the Lottery.

First I have an intention to win the lottery

2) going to buy the lottery in habbit

3) You can propose the final outcome especially when
you win the lottery what will you do afterwards like
purchase a new house ,car and marry.

4) attend the charity event . Not only you give out but also
you will receive something in future.

5) practising, practising, non stop until you achieve your
goal.

In short the law of attraction can apply in our reality .

For instance I want to receive a promotion and improve
and enhance friendship network.

positive attracts positive otherwise

negative attracts negative.
