A black-out day can have two different meanings:

- 1) a day for getting completely drunk
- 2) a day of no power.

A black-out date can mean a sexual dating game in which you don't even know in advance whom you are dating.

And it could also be a date on which a man has no "power".

If Enigma says "my black-out dates are everyday except tomorrow heheh", what do you think he probably means?
