Dear Mr Glotyynn, Sir

Could you or some experts in the field of economics please assist me with this question?

â€œAcademia do not like to think about the most difficult questions, they like to think about the most basic theories, since the most basic questions would have the most complex answers as they have more grounds to cover. The following statement covers many aspects of the complexities of emerging economies.

“TAIWAN AND CHINA ARE DRIFTING TOGETHER SPURRED BY ECONOMIES UNITING THE TWO”™

In your own words write an account of how you think the global economists will perceive the development of the future economies of these two countries.â€•
