Yesterday,i went on a bike trip with my students.My nephew went out with me but he was too young to ride a bike so i gave him a ride.

We met at the front gate of my school and then rode all the way to the sea. It took us about 40 mins to get there. There are some bike trails so we chose one.On the way to the harbor, we enjoyed the beautiful scenery. At the harbor,there were a lot of food stands selling seafood. We enjoyed the food there and then we went up on a tall bridge and stayed on it. We took a rest there then went to the beach. Some boy students told me they wanted to play on the beach.We stopped at the beach and my students and my nephew went to the beach and caught some crabs and shrip. It was scorching out there but they had a good time.

One the way back to school,it was so painful coz we ran out of energy. When we got back to school, I found all of us got tanned and red. So cute!!!

Although we were exhausted, my students still look forward to going on a bike trip again.

Lynn
