PRELUDE

Recently, a certain English website in Taiwan was the victim of a DOS attack. For some reason, the owner of this victim site is sure that the attacker was the owner of another English website in Taiwan.

I don't want to name any names here... Let's call the victim site Goliath.com.tw (GCT), and its owner Goliath. Goliath has a personal blog which he uses as a platform to launch his accusation to whom he thinks is doing the DOS attacks.

This is where I come in, I posted on his blog trying to hint to him why he was attacked. But he deleted a couple of my posts because I told him the truth about himself, and how he and his staffs mis-treated ex-members on his site, and he could not take it in. I had no other choice but to borrow Tim's site to make one more comment to Mr. Goliath. I know Mr. Goliath will read this because he and his staffs keep an eagle's eye on this website (this information is provided by one of the staff of okenglish.tw), and by the way, their purpose of watching this site is not to learn English.

Mr. Goliath,

It is not me you are hurting when you delete my posts, it is yourself. You are letting the world know what kind of person you really are. Why are you getting DOS attacks? Maybe I can offer you a hint... did you finally pissed off the wrong person? There is nothing wrong with your GCT site, I love it, I love Tim's site too, and a number of English sites in Taiwan as well. But why is it that you are the only one attacked? If you don't know, you can call a GCT steering committee meeting and try to figure it out. By the way, do you have a rocket scientist on your committee, you might need their help to figure this one out.
