## PART I

I am \*\*\*, grew **growing** in a family with **of** four members. My father had been served as a commissioned officer in military troops for ten years and now **before** he is **became** a music teacher in a junior high school. My mother is a housewife. **Besides**, I still have an **a** younger brother who is an engineer in the **an** LCD manufacture **industry**. My family education is **was** very severely **strict**, which especially is emphasized **emphasizing** on ethics, morals and responsibility. Therefore, I have **developed** individual characters of independence and always keep a positive and initiative manner toward life since childhood.

I had studied in **The** High School of National Normal University, which provided a free environment for studying, and I discovered my interests in life sciences, so I chose to study in a department related to life sciences in the university. I graduated from the department of agriculture chemistry in National Taiwan University, which provided **where I received** a good training in chemistry and **with** many practices in the experiments, so I have **acquired** a strong background in chemistry, which help **ed** me to study life sciences in the molecular way. **Then** I had been **pumped myself up to being** a graduate student in the institute of microbiology and biochemistry in National Taiwan University **where I completed** the topic of my master thesis is **with the topic** "The production of insulin-like growth factor fodder yeast". Therefore, I am familiar with techniques about microorganism incubation, animal cell culture, DNA engineering and protein purification.
