PART II

I **yearned** for science **researches**, because I could **thereby** put the knowledge into practice and contribute to my country. Formerly **The former** laboratory experiences impressed me very much and told me that research does not only depend on enthusiasm, but also clear **clarifies one's** thoughts; not only repeated demonstration, but also the resolution **in pursuit of the resolution out of repeated demonstrations**. Therefore, I want to join a team devoted to **researches**. In **addition** to exploring a topic of research with my laboratory experiences, I hope to obtain new stimulations and a significant growth.

An important individual character of mine is that I always carry out **keep** my own responsibilities and **perform** the obligations of my own work to the best of my abilities. I 'm very earnest in my job and request **often push** myself strictly. I obtained some awards in my student life, such as the Mayor Awards in the senior high school days and the Complete Attendance Award in the **whole** high school days **stage**. I am also the recipient of the Student Service Education Awards in National Taiwan University in 1998 and 2001. I have been a soldier in the obligatory service for 15 months and volunteered to join the airborne forces in my military life. I completed not only the airborne training camp, but also a mountain march **of** approximately 240 miles, which showed my endurance and enthusiasm to achieve my goals. I devote myself to anything I want to achieve and hold on straight to the end.
