The facts are there, like it or not, dont turn your back on it, face it, 2050 is on its way, only 40 years from now, how old will you be when it comes? what kind of life you will have?

Not just eat less meat, less air condition, less cars but also less shoppings.

We all have too many clothes and shoes and this and that in our house. We all are to buy less, only buy those are on the shopping list.

Life was so simple when I was a kid, we had only two pots at home. One to fry food and one for soup, now, I counted, almost 10 pots for the rice cooker, 2 woks, 3 pans, and at least 10 soup pots, do I need so many???? Not counting thermo cookers and pressure cookers. I have to say, the advertisements and pomotion skills are too powerful.

In China, the factory of the world, Changjiang River has become black river. In South America, Amazon River is severely polluted, we all are obligated to do something. Let's start from your shopping list.

Only buy things that you need.
