No need to panic, but facts are there:

(1) using sea water to cool it off, which means the sea water is contaminated

(2) the vapor is going to the air

(3) the explosion this morning

but, luckily, the wind is not coming towards to our direction.

Anyway, let's pray for Japan. May God gives peace to who were deceases and give those who survived courages to continue.

yeah, Cloud, what a tragedy there, and it is on going

Let every one of us pray to God, dont let it get worse.
