Hi Rony:

Only yesterday, TV news said Fuji Mountain may get awoken by these more than 800 quakes after the big one.

And, the 'volcanos', Shinmoedake shot out smoke over 4000 meters high 4 days ago. This area still has many strong earthquake almost daily.

The worst is the rumors circulating. An email I got this morning saying the earthquake is caused by the nuclear test by Japan which is consented by USA, give me a break!!! Japanese so stupid and ran a nuclear test under the sea?

And other stories came with the email, accusing the death of Chinese in Japan quake in 1923, the pdf says Japan practise on them to prepare for the invasion to Korea while the invasion was in 1910, ... again, I see only brainwash purpose, after all, how many is clear of the history especially the text books may full of propaganda. Even some might get on internet to check, but the story so conflicting, ....

and other attachments, same, brain wash stuffs, sophisticate lies

I can only pray, May God bless human beings.....

Well, I can still buy salt at regulator price here in Taiwan. I call this "luck"

How is the salt supply in your area?
