that really kills me, i wanted to write some codes to calculate the problem, but after some thoughts, i gave up,cuz even the codes could solve it, it has to calculate billions of times, there must be some other unregular method.

all i got is

```
32   18   19   29
21   27   26   24
25   23   22   28
20   30   31   17
```

but obviously, it doesnt completely meet the requiements.
Gimme some more time
