By the way, should "Hugs" be considered as an "acronym" then? And "Hugz", a proper noun?

==> HUGS ('H'askell 'U'ser's 'G'ofer 'S'ystem) (also Hugs 98) is a bytecode interpreter for the functional programming language Haskell.

Hi Lady

The following link says that the word 'hugs' is used as a generic name.

http://cvs.haskell.org/Hugs/pages/users_guide/faq.html

QUOTE

8.1. What is the correct name for Hugs?

We use "Hugs" as a generic name for the interpreters we build.

UNQUOTE

If it is not an acceptable word, I am happy to withdraw my entry.

Cheers!

Geoette, my question is for reflection use only and does not require an answer to it since what's past is past. Do continue with the game. Perhaps reflections on the question might help us in the future when designing new word games. Regards.
