VILLAIN

A villain is typically brilliant and clever, and a master schemer. He lacks value and is always up to mischief. He plays tricks simply to entertain himself so he can marvel at his own ability and domination over others. He is an archetypal betrayer, seemingly to be on your side but eventually betraying you to the enemy.

One would equate a villain to a hypocrite who uses plebeianism to get what he wants, including favors from ladies. He may promise much in return, but in fact gives nothing. He seeks to usurp the glory of others, either by claiming to have done what others did, or otherwise by claiming some other greatness that does not rightly belong to him. He is also psychopathic, one who has the classic symptom of a psychopath. He lacks empathy for others and combines his cunningness to manipulate others in unbelievably callous ways. He is an evil genius, very clever in turning his ingenuity to selfish and harmful means. The tendency for lying, however, sometimes betrays him and lays bare his scheme. He appears to be good, right up until the moment of betrayal, making him very difficult to detect and defeat.

WHAT ARE THE EVIL INTENTIONS OF A VILLAIN?

A villain allows for every eventuality including deliberately being caught in the act using an assumed name. He may also leave a signature, such as using his victimsâ€™ names or some other despicable symbols as an insult to his targets as well as a camouflage for himself.

This unholy character has his own agenda and executes it closely. He sets traps to ensnare the unwary and ply false trust to lead the naive astray.

HOW DOES ONE DEAL WITH A VILLAIN?

To deal with a villain, one must outwit him at every turn, including avoiding the snares and false trails that he leaves behind.

When exposed, he acts very cowardly and will squeal easily under pressure. But when he turns fanatic, it is difficult to defeat him, as he momentarily strays from his hitherto cowardice and puts his mission above his own safety and fight like a madman at the spur-of-the-moment.

Given what a villain is and what his evil intentions are, one knows better than engage or even corner him.
