Yes, it is line 19 or 41 ... at the other side! But line 2 is better ...

I enjoyed it to drive around with the trams ... learned most about daily life in this way. I nearly know now every line ... and had some really very special experiences with people of Budapest there.

One day I used a line ... suddenly it stopped ... and I had to go out. Immediately some people around me discussed very engaged how to bring me "on line" again to the place where I planned to go ... was a beautiful moment ...

Really was fun!!!
