According to my experience I seldom to purchase the lottery which is not my favour .Besides I often apply the above theory (Law of attaction) to my work. Sometimnes it works in my personal experience. Likewise I present my job better than my comrades .Actually I am not high intelligent than them but I have set my goal and dream in beginning. After fulfilling my goal I will set the another goal. I think it is a big difference from them because of my dream. Secondly I try and keep it in pace. No matter how hard and failed until I got my goal.
