I feel so depressed on the friends' relatives,something beginning two month ago:

My BF's relatives want to work in my factory,but they don't suit for the worker's standard in my company.I took hard to help them in,but unexpectedly one isn't succeed for her body check,and one wants to leave no any rule doing.But I can't ask them do that to me,I can't ask for them considering my feeling,just for they are not my relatives.But I know my relatives won't lose my face,I know.

I feel I am harm by them.I will lose my face in my position,and it will harm my management in the future.Well,this is my wrong decision to them.People will be smart when he undergos one wrong thing.I won't help them again,his relatives is just let me feel terrible and hard,but nothing can repay me.

Woo,something help me grow.
